

Adang Hidayat

MECHANICAL ENGINEER

Kunciran Indah,Tangerang | adanghidayat.97@gmail.com | <https://portfolio-adang.netlify.app/>

SUMMARY

I'm graduate from Mechanical Engineering major specialized in Manufacturing, Politeknik Negeri Jakarta who active, responsible, and hard worker. I have experienced designing jig, fixture, maintenance, and rotating equipment. I will be enjoyed working on designing, improving process, analyzing by using lean and six sigma methods.

PROFESSIONAL EXPERIENCE

Mechanical Engineer – Research & Development Dept

Feb 2025 - Present

PT Tata Sarana Mandiri (TSM Technologies)

- Plan & Improve SOPs and production process flow diagrams
- Perform maintenance and troubleshooting on production equipment and tools.
- Responsible for machine and jig related to production
- Design and draft production equipment such as jigs and fixtures
- Controlling Equipment (Machine/Jig/Fixture) calibration and periodic equipment check.
- Develop design fixture automation for Functional Acceptance Test (FAT) product Bexa with using system 3 axis X, Y and Z
- Fabrication the prototype using 3D printing of Bambu Lab A1
- Understanding of lathes, laser UV, milling machines, 3D Printing, and CNC machines

Mechanical Engineer

Sept 2024 - Nov 2024

PT Surveyor Indonesia – PMC PT Pertamina EP Jatibarang

- Conducting daily monitoring and evaluation of mechanical rotating and static equipment.
- Negotiate prices with suppliers/vendor
- Look for new suppliers for comparative supplier purposes or supplier databases.
- Coordinate with users regarding procurement of goods
- Evaluate suppliers based on price, quality, and timeliness of delivery of goods
- Oversaw the validation of technical documentation, operational procedures, and project outcomes.
- Monitor progress, review deliverables, and coordinate with offshore team.
- Responsible project “Jasa Pengoperasian & Pemeliharaan GTG X-Ray di PEP Jatibarang Field”

Maintenance Staff**April 2022 - May 2024****PT Battery Technology Indonesia**

- Designing systems and components that meet the needs and requirements using CAD Software (Solidworks & Autocad).
- Streamlined manufacturing processes, reducing production costs by 10%
- Led development of an advanced automation system, achieving a 15% increase in operational efficiency
- Implemented preventive maintenance strategies, resulting in a 20% decrease in equipment downtime.
- Perform maintenance on production machines according to the Preventive Maintenance Schedule.
- Troubleshoot breakdown, repair, servicing and maintenance of Machine Automation with Pneumatic System.
- Calibrating/Set Up Machine Pneumatic, Jig & Fixture, Laser Welding, Robot Automation and Printing.

Production Staff**June 2021 – Dec 2021****PT Rachmat Perdana Adhimetal**

- Estimate budgeting cost of consumable production.
- Supporting a trial new project by Team Engineering.
- Control overtime daily, weekly & monthly by abnormality production.
- Creating work instructions to need process production.
- Management Inventory Control.
- Input daily and monthly production result.

SKILLS

Solidworks
Autocad
Fusion 360

AVEVA E3D
Ms. Office
Rotating Equipment

Static Equipment
Piping & Instrumentation Diagram

EDUCATION

Bachelor of Applied Science (D4) in Mechanical Engineering**2016 - 2020**

Politeknik Negeri Jakarta

- Major Specialized in Manufacture Engineering GPA 3.07 of 4.00

ADDITIONAL INFORMATION

- **Languages:** English, Indonesia.
- **Certifications:** TOEFL Prediction score 540, Solidworks, Autocad
- **Awards/Activities:** Best 1st Slalom at Kompetisi Mobil Listrik Indonesia (KMLI at Polban) - 2019
