

Adang Hidayat

MECHANICAL ENGINEER

Kunciran Indah,Tangerang | adanghidayat.97@gmail.com | 0857-7522-2621
<https://portfolio-adang.netlify.app/>

SUMMARY

Detail-oriented Mechanical Engineer with over 4 years of experience in manufacturing and energy sectors, specializing in **Rotating Equipment** and **Automation Equipment**. Proven track record in conducting technical evaluations, preventive maintenance, and process optimization. Certified in **Basic Mechanical Rotating Engineering for Oil & Gas**. Expert in utilizing Solidworks, Autocad, Fusion 360, AVEVA E3D, and Ansys to enhance operational reliability and reduce downtime by up to 20%.

EDUCATION

Bachelor of Applied Science (D4) in Mechanical Engineering Politeknik Negeri Jakarta	2016 - 2020
• GPA 3.07 of 4.00	

PROFESSIONAL EXPERIENCE

PT Tata Sarana Mandiri (TSM Technologies) PT. Tata Sarana Mandiri or called TSM Technologies is a company providing Smart Mobile Solution in the areas of smartphone, fintech, smart city, and Internet Of Things. Innovation and Creativity is the core of everything we do and it drives the discoveries we make and the technologies we create website: www.tsmid.com city: Jakarta, Indonesia	
Mechanical Engineer – Research & Development Dept	Feb 2025 - Present
• Prepare technical drawings, BOMs, and production support documents. • Create and revise 2D & 3D mechanical designs using CAD software. • Design & develop work method, line tooling (jigs and fixtures), line layout, and manpower for production • Develop design fixture automation for Functional Acceptance Test (FAT) device for detect breast cancer with using system 3 axis X, Y and Z • Coordinate with the electrical and firmware teams for hardware integration.	
Jr. Mechanical Engineer	Sept 2024 - Nov 2024
PT Sucofindo Indonesia – PMC PT Pertamina EP Jatibarang	
• Conducting daily monitoring and evaluation of mechanical rotating and static equipment. • Oversaw the validation of technical documentation, operational procedures, and project outcomes. • Monitor progress, review deliverables, and coordinate with offshore team. • Responsible project “Jasa Pengoperasian & Pemeliharaan Gas Turbine Generator (GTG) X-Ray di PT Pertamina EP Jatibarang Field Zona 7”	

- Review Design & Drawing of Gas Turbine Generator which contain of :
 - Compressor, Turbine, Generator, Filter Intake, etc.
 - Review mechanical document and drawing for proporsal/tender and construction needs.
 - Procurement and Vendor Management: Managed the process of requesting quotation (RFQ) and technical bid evaluation (TBE) for the procurement of mechanical equipment

PT Battery Technology Indonesia (TWS Technology)

PT Battery Technology Indonesia, the wholly-owned subsidiary of TWS Technology, TWS is a dynamic fast-growing Asia-based supplier of rechargeable energy storage solutions. Recognize as a leader in providing innovative solutions for energy storage applications. We aim to be at the forefront of new technological development in our industry. Leading the market in Value, Quality and Service. Customer : OPPO, VIVO, GESITS, Etc

Maintenance Staff

April 2022 - May 2024

- Designing systems and components that meet the needs and requirements using CAD Software (Solidworks & Autocad).
- Streamlined manufacturing processes, reducing production costs by 10%
- Led development of an advanced automation system, achieving a 15% increase in operational efficiency
- Implemented preventive maintenance strategies, resulting in a 20% decrease in equipment downtime.
- Perform maintenance on production machines according to the Preventive Maintenance Schedule.
- Troubleshoot breakdown, repair, servicing and maintenance of Machine Automation with Pneumatic System.
- Calibrating/Set Up Machine Pneumatic, Jig & Fixture, Laser Welding, Robot Automation and Printing.

Production Staff

June 2021 – Dec 2021

PT Rachmat Perdana Adhimetal

- Estimate budgeting cost of consumable production.
- Supporting a trial new project by Team Engineering.
- Control overtime daily, weekly & monthly by abnormality production.
- Creating work instructions to need process production.
- Management Inventory Control.
- Input daily and monthly production result.

SKILLS

- **Rotating Equipment:** Gas Turbine Generators, Centrifugal Pumps, Compressors, Alignment, Vibration Monitoring.
- **Engineering Software:** Solidworks, AutoCAD, AVEVA E3D (Piping Design), Ansys Mechanical, Fusion 360.
- **Maintenance & Reliability:** Preventive & Corrective Maintenance, TPM, Root Cause Analysis (RCA).
- **Standards & Tools:** Lean Six Sigma, QCPC, BOM Development, ASME B73.1, API 610, API Standards (Basic Awareness).

ADDITIONAL INFORMATION

- **Languages:** English, Indonesia.
- **Awards/Activities:** Best 1st Slalom at Kompetisi Mobil Listrik Indonesia (KMLI at Polban) – 2019

IMPROVED SKILL AND CERTIFICATION

Anak Teknik Indonesia

- Basic Mechanical Rotating Engineer in Oil & Gas
- Engineering of Pump Systems in Oil & Gas : Design, Documentation, and Comisioning

- Piping Design traing using software Aveva E3D
- Ansys Mechanical Beginner

Global English Course (Kampung Inggris Pare, Kediri)

- Learning basic – intermediate English (Vocabulary, Speaking, Grammar, Pronounciation, Writing)
- Preparing Toefl for prediction and ITP Certification

Sigma Design School (Depok)

- Learning software Autocad, Autodesk Inventor, Sketch up and Solidworks
